

Figure 6. Vertical (A) and east-west (B) components of linear deformation rate (in cm/year) map of interested area from Radarsat-2 MF6 and MF7L acquired between April-August 2008, superimposed on SAR average amplitude image of the study area. Deformation rate values (cm/year) are clipped to $[-1, -0.6, 0.6, 1]$. R marked in black was used as stable reference.
