

5 Prof. Guoxiang Chi

Name: Guoxiang Chi

Organization: University of Regina

E-mail: guoxiang.chi@uregina.ca

Education

Ph.D. (University of Quebec at Chicoutimi);

M.Sc. (Chinese Academy of Sciences);

B.Sc. (Fuzhou University)

Research Interests

Mineral Deposits Geology and Geochemistry; Geofluids

Major Publications

Chu, H., Chi, G. 2016. Thermal profiles inferred from fluid inclusion and illite geothermometry from sandstones of the Athabasca basin: Implications for fluid flow and unconformity-related uranium mineralization. *Ore Geology Reviews*, v. 75, p. 284-303.

Chi, G., Lin, G. 2015. Relationships between hydrodynamics of mineralization and tectonic settings. *Geotectonica et Metallogenia*, v. 39, p. 402-412.

Chi, G. 2015. Constraints from fluid inclusion studies on hydrodynamic models of mineralization. *Acta Petrologica Sinica*, v. 31, p. 907-917.

Chu, H., Chi, G., Bosman, S., Card, C. 2015. Diagenetic and geochemical studies of sandstones from drill core DV10-001 in the Athabasca basin, Canada, and implications for uranium mineralization. *Journal of Geochemical Exploration*, v. 148, p. 206-230.

Chi, G., Xue, C. 2014. Hydrodynamic regime as major control on localization of uranium mineralization in sedimentary basins. *Science China – Earth Sciences*, v. 57, p. 2928-2933.

Chi, G., Chu, H., Scott, R., Chou, I.-M. 2014. A new method for determining fluid compositions in the H₂O-NaCl-CaCl₂ system with cryogenic Raman spectroscopy. *Acta Geologica Sinica*, v. 88, p. 1169-1182.

Chi, G., Li, Z., Bethune, K. 2014. Numerical modeling of hydrocarbon generation in the Douglas Formation of the Athabasca basin (Canada) and implications for unconformity-related uranium mineralization. *Journal of Geochemical Exploration*, v. 144, p. 37-48.

Xue, C., Chi, G., Li, Z., Dong, X. 2014. Geology, geochemistry and genesis of the Cretaceous and Paleocene sandstone- and conglomerate-hosted Urogen Zn-Pb deposit, Xinjiang, China: A review. *Ore Geology Reviews*, v. 63, p. 328-342

Zhao, X., Xue, C., Chi, G., Wang, H., Qi, T. 2014. Epithermal Au and polymetallic mineralization in the Tulasu Basin, western Tianshan, NW China: potential for the discovery of porphyry Cu-Au deposits. *Ore Geology Reviews*, v. 60, p. 76-96.

- Chi, G., Bosman, S., Card, C. 2013. Numerical modeling of fluid pressure regime in the Athabasca basin and implications for fluid flow models related to the unconformity-type uranium mineralization. *Journal of Geochemical Exploration*, v. 125, p. 8-19.
- Chi, G., Xue, C., Qing, H., Xue, W., Zhang J., Sun, Y. 2012. Hydrodynamic analysis of elastic injection and hydraulic fracturing structures in the Jinding Zn-Pb deposit, Yunnan, China. *Geoscience Frontiers*, v. 3, p. 73-84.
- Chi, G., Lai, J. and Solomon, A. 2011. Fluid inclusion and stable isotope study of the Buffalo gold deposit, Red Lake greenstone belt, northwestern Ontario, Canada. *Exploration and Mining Geology*, v. 19, 135-149.
- Chi, G., Guha, J. 2011. Microstructural analysis of a subhorizontal gold-quartz vein deposit at Donalda, Abitibi greenstone belt, Canada: implications for hydrodynamic regime and fluid-structural relationship. *Geoscience Frontier*, v. 2, p. 529-538.
